SINCE 2024 · JODHPUR

A farmer's son. One crop. *One region.*

VC Export was started in Jodhpur in 2024 by a farmer's son from western Rajasthan.

Anyone who grows up on a farm sees how much a crop can lose after it leaves the field. Poor cleaning, mixed lots or a damp godown can cost the farmer and the buyer both.

We started VC Export to handle that part properly for one crop, cumin.

Cumin is grown once a year, in winter. Mandi arrivals peak in March, when oil content is usually highest and prices lowest: usually the best time to contract.

Seven stages. *Every lot.*

7 STAGES

1 LINE, ALL GRADES

01

Sieving

Stones, stalks, soil and oversized matter out on a vibrating sieve.

02

Aspiration

Air pulls out chaff, empty seed and dust, ducted to cyclones.

03

Gravity table

Light, immature and insect-damaged seed separated by weight.

04

Grading

The flow splits three ways: Grade I, Grade II and rejection.

05

Indent cylinders

Catch broken seed and weed seeds that weigh the same as cumin.

06

Sortex colour sorting

A Satake REZX4500 checks every seed with cameras.

07

Bagging & sampling

Bagged with your marking. A sample goes to the lab.

SEE IT YOURSELF

Visit *the line.*

Buyers and their agents can visit by appointment.

Proven in a lab, *not a promise.*

Every lot goes to a third-party **NABL-accredited lab** before packing. The report travels with your documents.

✓ EVERY LOT

Pesticide residue

A common reason Indian spices are held at EU borders. Tested against EU MRLs, or your own list.

✓ EVERY LOT

Salmonella & microbiology

Tested for salmonella, E. coli, total plate count, yeast and mould.

✓ EVERY LOT

Aflatoxin

Cumin kept warm and damp can grow the mould. Tested against 5 ppb B1 and 10 ppb total.
